FLASK INSTALATION AND PROJECT

task	creating a flask project
date	19th October 2022
team id	PNT2022TMID50612
project name	smart fashion recommender

```python
from flask import Flask,redirect,url_for,render_template

app =Flask(__name__,template_folder="template")
@app.route('/')
def greet():
    return "hai"

@app.route('/login/<name>')
def login(name):
    return "hello %s" %name

@app.route('/page/<int:id>')
def page(id):
    return "page number is %d" %id

@app.route("/admin")
def admin():
    return "hello world !"
@app.route('/user/<name>')
def helo(name): # this function used for navigate different route

    if name =="admin":
        return redirect(url_for('admin'))
    else:
        return redirect(url_for('login',name=name)) # variable will assgined for
route variable/

@app.route("/jana")
def jana():
    return "<html><body><h1>janarthanan k</h1></body></html>"
@app.route("/mani")
def mani():
    return render_template('janarthananresume.html')
```

```
@app.route("/h")
def d():
    return render_template('index.html')
if __name__=='__main__':
 app.run(host='0.0.0.0',port=8080,debug=True)
```

output:

hello jana
